TO WHOM IT MAY CONCERN

Since he was introduced to WordPress in mid-2014, Phillip Chalker has become a capable website editor and manager.

He maintains his own website, www.latrobemusic.com which was built for his needs. Phillip uses both a Mac computer and an iPhone through their in-built voice recognition facilities. He has even developed techniques for producing the feature graphics which accompany his event posts.

Completely on his own Phillip has also built and managed content for his own blogging website, www.latrobemusicblog.wordpress.com, a blog which is hosted by WordPress.

Phillip is an energetic person who has contributed his knowledge and skills to support others, both musically and with information technologies.

Phillip's music is appreciated in the wider community and he has contributed to the resources of Blind Citizens Australia through his own self-made audio tracks.
